HEALING AT THE EDGE: CONSCIOUS LIVING, CONSCIOUS DYING

**A WORKSHOP FOR CAREGIVERS, THERAPISTS AND
ANYONE WANTING TO DEEPLY EXPLORE HEALING**

Physical healing, emotional healing, spiritual healing, collective healing – the journey to wholeness takes many forms and has many starting points. Each of us is at a particular point on our healing path, confronting our next challenge, often without clearly knowing whether attitudes or practices we have been using to facilitate growth in ourselves or in our clients are becoming stale, without knowing which direction we should turn to create meaningful transformation.

In this workshop we will draw upon the wisdom of Buddhism, the diagnostic message coming from the connection between stages of early childhood development and energetic patterns in the adult body, as well as the softening and the passion of an open heart. Having explored these wisdom traditions during 35 years of being a guide to the dying, a clear and practical paradigm for the healing path has become apparent to me. Healing occurs through direct contact with the Sacred, through realization of our true nature. There are no shortcuts, but certainly neither taking unnecessary detours nor spending time spinning our wheels can inspire us along what is often a difficult journey to a life consciously lived.

During this workshop we will explore together a clear, concise and usable model of the healing process that can specifically diagnose and identify the next step that is transformational for each of us, even during crisis. Short, intensive, guided meditations and other practices will be presented to create a healing experience that will lead to a life consciously and compassionately lived and eventually to a conscious death. We're all caregivers and all seekers of healing. These deeply uncertain times are an incredible opportunity.
